

# Content Delivery

## Library Test Kitchen

Seminar 09125  
Tuesdays, 10am - 1pm  
Fall 2012  
Graduate School of  
Design  
Harvard University  
Cambridge, MA

### Assignment

Create a classification scheme for a collection (of your choice or creation). Design the library-scale display/distribution infrastructure to suit.

### Deliverables

1. Where possible, use different tools/media/methodologies than Exercises I or II to represent your ideas. Your project should:
  - a.) Unpack your classification scheme
  - b.) Articulate the relationship between classification scheme and display/distribution infrastructure
  - c.) Take us through two use-cases to understand system-level functionality.

*All documentation of projects must be posted to your blog by September 25th for discussion.*

### Expectations for Exercises

- Exercises are delivered as blog posts. Your post should include all visual documentation along with articulation of your thinking.
- Print-ready, 300dpi images should be deposited in the Dropbox /Exercise-# folder.
- Be prepared to present your work to the class for discussion.
